

Your draft-night guide

For Steven McAlear | Thursday, September 17, 2026

The job: build a good Yeti roster while giving OT, DT, Peter, Tom, Matt and Dan a clear place in the plan. The app weighs those preferences against who may be gone by your next usable turn.

Set up the room

- 1. Open the updated app.** Visit <https://sslgolf.com/westmount-draft.html> on your phone or laptop. Keep these PDFs available as a paper backup. Use Save backup to move the live draft between devices.
- 2. Set the first-round order.** Open Draft setup and use the up/down arrows beside the six teams. Changes save automatically. Order locks after the first recorded pick; undo all picks or start a new draft to change it.
- 3. Negotiate the captain rounds.** Keane must take himself in round 1. Enter the other agreed rounds below, then mark Agreed in the app. The model follows unagreed planning rounds in previews; manual picks remain flexible until they are agreed.
- 4. Confirm roster size and goalies.** The workbook contains 82 players: 76 skaters and 6 goalies. Fourteen rounds creates 84 slots and remains a planning default. Resolve the goalie attendance discrepancy before relying on the full pool.

Captain worksheet

Captain	Working team	App default	Agreed in the room
Keane Kelly-Menard	Keane / New	R1	R1 required
Steve McAlear	Yeti	R2	Round: _____
Alex Mashaal	Kings	R3	Round: _____
Adam Ciampini	Hawks	R9	Round: _____
Philippe Martin	Flyers	R10	Round: _____
Emile Murciano	Devils	R11	Round: _____

Team names are working labels. All captains belong to their own teams and use a normal draft pick. Every default except Keane's R1 is provisional.

Keep the live record clean

Record each selection with **Draft player** or **Draft myself**. Use **Undo pick** for the last mistake. **Preview full draft** continues a separate copy. **Run simulations** explores possible continuations. **Save backup** exports the live draft; **Restore backup** imports it.

Dates: showcase Monday Sept 14, 8:50-10:00 p.m.; draft Thursday Sept 17; opener Tuesday Sept 22. Check the league schedule each week for time and rink.

Build the group, keep options open

Use the current board when a name comes off the list.

Steve's six targets

Player	Last draft	Last-year PTS / GP	Base value
Chris OT (Ong Tone)	R1	52 / 27	36.5
David Toledano (DT)	R6	41 / 30	21.5
Peter McAlear	R4	No stats	12.0*
Tom McAlear	R9	36 / 32	14.5
Matt McAlear	R11	15 / 23	5.0
Dan McAlear	R13	23 / 23	10.8

Historical rounds are from the five-team draft. They do not prescribe this year's pick. **Peter's scoring history is missing**; the model uses a neutral value. DT is interpreted as David Toledano. * = estimated from missing statistics.

Make the next turn part of the decision

Keep **Prioritize this group** on. Star or unstar players to change the group. When two targets are available, consider who is less likely to last until your next open pick. If a target is already taken, use the available alternatives and record the actual outcome.

No fixed family rounds. Tom R9, Matt R11 and Dan R13 describe last year. Waiting for those rounds this year may lose them. Keane and the other opposing captains are unavailable to Yeti.

Goalies on the updated list

Goalie	Last-year GAA	GP	Information
Euan Martin	3.02	32	Stats available
Michel Gironne	3.35	29	Stats available
Jared Lach	3.77	31	Stats available
Evan Yarrow	3.81	27	Stats available
Ewan MacIver	-	-	No GAA
Josh Pinto	-	-	Info pending

The workbook lists six goalies, while Alyssa's email reports two vacancies. **Confirm participation.** Josh Pinto is waiting for information, and Ewan MacIver has no goalie statistics in this app. The planner currently includes all six.

The app permits one goalie per team and reserves a late slot when needed. Earlier choices compare the quality of the nets still available. GAA also reflects the team in front of the goalie. There is no guaranteed named leftover.

If your preferred player is gone

Other skaters worth comparing on the live board: Michael Larose, Michael Smith, David Cottingham, Lucas Clarke, Christopher Angelini, Konrad Horner-Borsu, Thomas Romary and Luca Viens. Use position needs, attendance information and showcase observations to break close calls.

Why the suggestion changes

The recommendation combines roster rules, player value and the risk of waiting.

- 1. Apply the rules.** Captains stay with their own teams. Agreed self-pick rounds and the final captain/goalie slots take priority. The six-team order reverses every round.
- 2. Estimate value.** Skaters blend recent and five-year scoring rates, compare with their position and get a modest attendance adjustment. Missing data uses a neutral estimate. Goalies use GAA. The printed value is a comparison score, not predicted season points.
- 3. Estimate demand.** Position needs affect the choice. With history on, known past picks contribute 20% of the adjusted value after scaling for six teams; former-team familiarity adds a small preference. Opponents' old queues are not enforced.
- 4. Add urgency for your targets.** Target bonus = 5 + 20 x the estimated risk of losing him before your next open pick. A target with 90% survival gets +7; one with 30% survival gets +19. These are chosen planning weights, not learned league probabilities.

Slot-4 example: pick #4 = teammate; pick #9 = you if your agreed round is R2; pick #16 = your next open turn. At #4, the useful question is whether DT lasts to #16. The app also allows for other captains spending turns on themselves.

Six-team snake: overall picks by first-round slot

Round	Slot 1	Slot 2	Slot 3	Slot 4	Slot 5	Slot 6
1	1	2	3	4	5	6
2	12	11	10	9	8	7
3	13	14	15	16	17	18
4	24	23	22	21	20	19
5	25	26	27	28	29	30
6	36	35	34	33	32	31
7	37	38	39	40	41	42
8	48	47	46	45	44	43
9	49	50	51	52	53	54
10	60	59	58	57	56	55
11	61	62	63	64	65	66
12	72	71	70	69	68	67
13	73	74	75	76	77	78
14	84	83	82	81	80	79

The provisional app order is Devils, Kings, Flyers, Yeti, Hawks, Keane / New. Set the actual draw in Draft setup. This table shows all 14 planning rounds; the draft ends if the pool runs out earlier.

Read percentages as estimates. Target survival is a rank-based formula using intervening opponents' chances to pick. Simulation shares are frequencies from separate sampled drafts. Neither predicts league wins or guarantees a player will remain available.

Paper draft board - 1 of 2

Mark the actual team or overall pick in the right-hand column.

Sorted by current **base value**; live recommendations also use roster needs, history and target urgency. **T** = Steve's target. **C** = reserved captain. * = no statistics. Last draft = historical round.

#	Player	Pos	Value	Last draft	T / C	Taken by / pick
1	Michael Larose	F	74.4	R1		
2	Keane Kelly-Menard	F	53.8	R2	C	
3	Christopher Ong Tone	F	36.5	R1	T	
4	David Cottingham	F/D	36.2	R2		
5	Michael Smith	F	32.3	R1		
6	Lucas Clarke	F	31.7	R1		
7	Euan Martin	G	27.1	R4		
8	Thomas Romary	D	25.9	R3		
9	Konrad Horner-Borsu	F	24.3	R2		
10	Christopher Angelini	F	23.2	R1		
11	Shawn T. Neeposh-Iserhoff	F	23.0	R7		
12	David Toledano	F	21.5	R6	T	
13	Luca Viens	F	19.6	R3		
14	Adam Ciampini	D	19.4	R9	C	
15	Michel Gironne	G	17.9	R6		
16	Daniele Gaiotti	D	16.9	R10		
17	Justin Goodman	F	16.1	R2		
18	Thomas McAlear	F	14.5	R9	T	
19	Max Shved	D	14.4	R5		
20	Nicholas Timmins	F	14.0	R5		
21	Nicholas Uththoff	D	13.4	R7		
22	Sean Avraam	F	12.5	R7		
23	Alessandro Galeone	F/D	12.3	R6		
24	Alexander Mashaal	F	12.3	R3	C	
25	Noah Byette	?	12.0*	-		
26	Noah Chazonoff	F	12.0*	-		
27	Daniel Chetrit	F	12.0*	-		
28	Samuel Cohen	F	12.0*	R9		
29	Stephane Cohen	F	12.0*	R10		
30	Hugo Culver	?	12.0*	-		
31	Evan Dimentberg	?	12.0*	-		
32	Ayden Dorey	F	12.0*	-		
33	Florent Duffar	?	12.0*	-		
34	Damien Gravenor	F	12.0*	-		
35	Benjamin Harnad	F	12.0*	-		
36	Hodge-Masnaghetti (as listed)	?	12.0*	R8		
37	Jeremy Kaplan	F	12.0*	-		
38	Ewan MacIver	G	12.0*	-		
39	Adrien Malka	?	12.0*	-		
40	Peter McAlear	F	12.0*	R4	T	
41	James Orsini	F	12.0*	R3		

C rows are reserved for the named captain's own team. Keane is R1 required; all other captain rounds must be negotiated. Scores were regenerated from the updated app on September 14, 2026.

Paper draft board - 2 of 2

Mark the actual team or overall pick in the right-hand column.

Sorted by current **base value**; live recommendations also use roster needs, history and target urgency. **T** = Steve's target. **C** = reserved captain. * = no statistics. Last draft = historical round.
